### SKILLS

Git

JavaScript

SQL

React

HTML & CSS

### EDUCATION

Software Developer

**Kaunas University of  
Technology**

2022-2026

### PROFILE

Software Developer with foundational knowledge in C#, MySQL, Linux, and Java from university studies, complemented by self-taught skills in HTML, CSS, JavaScript, and React. While early in my career, I am dedicated to leveraging my understanding of technologies to contribute effectively to projects. Enthusiastic about further developing my programming skills and exploring new technologies. Motivated to join innovative teams and face new challenges in software development.

### WORK EXPERIENCE

#### Customer Success Specialist

Hostinger

Aug, 2023 - Dec, 2023

As a Customer Success Specialist at Hostinger, I was dedicated to ensuring the success and satisfaction of our customers by providing support and solutions tailored to their needs. I collaborated with cross-functional teams to identify and address customer concerns.

- Provided proactive and responsive support to customers, resolving inquiries and issues to ensure a positive experience and foster long-term relationships.
- Created and delivered training materials and resources to educate customers on product features and best practices, empowering them to maximize the value of our offerings.
- Collaborated with the sales and marketing teams to identify upsell and cross-sell opportunities, contributing to revenue growth and customer retention.

#### Front-End Developer

University project

Jan, 2024 - May, 2024

Collaborated with classmates to develop a React Native mobile application that facilitates social interaction within groups. Key features included user registration, group creation, event planning, and an integrated calendar. The application supports both private group events and public events visible to all app users.

I personally worked on:

- Authentication System:** Developed a complete register, login, and logout functionality ensuring secure user access.
- UI Implementation:** Translated Figma designs into functional user interfaces, maintaining fidelity to the original design specifications.
- Front-end Development:** Executed various front-end tasks, optimizing the user experience and interface responsiveness.
